ing tried in the United States district court in New York this week. It is the ejectment suit of George Washington Bowen against Nelson Chase, to recover possession of the famous "Jumel estate," consisting of 126 acres of the finest land on Washington Heights in New York city; of the property on the northeast corner of Broadway and Liberty streets, and of a lot in Liberty street, the whole being worth, at present market prices, about \$6,000,000. This suit was tried in January last, and attracted public attention all over the country, although there was nothing peculiar in the jury, and the whole of the proceedings were much less interesting than those which are to follow promise to be. In view of the fact that the interests involved are so enormous, the court has now ordered "a struck jury." the first, it is un-derstood, ever impanneled in this country. It consists of a panel of 48 prominent citizens, from which the jury to try the case is pruned by the counsel on each side, alternately striking out one name after another, until only twelve

RECEIPTS OF THE SOCIETY OF PROPAGAN-DISTS - The receipts of the society for the pro-pagation of the faith at Rome for the year 1871 were \$1.004.175, of which all but \$55,000 was gathered in Europe, France being the largest contributor. During the same period the amount of \$1,090,640 was expended by the society, the total expense of the collection and expenditure being only \$6,335. The Catholic church has certainly learned to do its work with economy. It is a noteworthy fact that Ireland, out of her poverty, gave to the propaganda during the year \$23,545, and only took back \$1,700. while Scotland gave only \$400, and received

ALLEGED FRAUDS OF CALIFORNIA HARBOR COMMISSIONERS .- The San Francisco Alta Californian publishes some astounding devel-opments of fraud in the state harbor commissioners' office, showing that deficiencies of more than \$300,000 have already been discovered. The pilfering seems to have been done by the wharfingers, who collect a certain amount for tonnage from the consignees of vessels. The practice was to return one-third or one-half to he commissioners' office and pocket the rest. In some instances the whole amount was stolen. DESTROYING DESTRUCTIVE INSECTS .- A

formula recently introduced in Great Britain for destroying caterpillars consists of a mixture of coal dust, common salt and flour of sulphur, to be scattered just before a rain over freshly plowed land. To exterminate caterpillars on trees, they may be sprinkled with a solution of one part of sulphide of potassium in 500 parts of water. This, it is said, will kill the insects and do no harm to the trees.

THE LAND SHARKS who rob and swindle sailors ashere have been making an immense effort to upset or circumvent the United States chipping act. In New York two emigrant runners who violated the law raised the issue that it is unconstitutional, but on Saturday Judge Benedict decided that it is strictly constitutional, and that it applies to foreign as well as American vessels.

AN INVENTION TO MELT SNOW ON RAIL-ROADS .- A citizen of Bedford county, Va., has invented a machine, the object of which is to melt the snow and ice on a railroad track as the train runs, by means of a flame of suffi-cient intensity to produce the result instantaneously. The invention is just in time, if effective.
